ManpowerGroup®

New Zealand Employment Outlook

The ManpowerGroup Employment Outlook Survey for the first quarter 2017 was conducted by interviewing a representative sample of 658 employers in New Zealand.

All survey participants were asked, “How do you anticipate total employment at your location to change in the three months to the end of March 2017 as compared to the current quarter?”

New Zealand Employment Outlook

	Increase	Decrease	No Change	Don't Know	Net Employment Outlook	Seasonally Adjusted
	%	%	%	%	%	%
Jan-Mar 2017	17	2	77	4	15	15
Oct-Dec 2016	19	4	75	2	15	15
July-Sep 2016	15	4	80	1	11	13
Apr-June 2016	14	4	80	2	10	9
Jan-Mar 2016	15	4	79	2	11	11

New Zealand employers report hopeful hiring prospects for the first quarter of 2017. While 17% of employers expect to increase staffing levels, 2% anticipate a decrease and 77% forecast no change, resulting in a Net Employment Outlook of +15%.

Once the data is adjusted to allow for seasonal variation, the outlook also stands at +15%. Hiring plans are unchanged quarter-over-quarter and improve by four percentage points year-over-year.

Throughout this report, we use the term “Net Employment Outlook.” This figure is derived by taking the percentage of employers anticipating total employment to increase and subtracting from this the percentage expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook.

From this point forward, all data discussed in the commentary is seasonally adjusted, unless stated otherwise.

Organisation-Size Comparisons

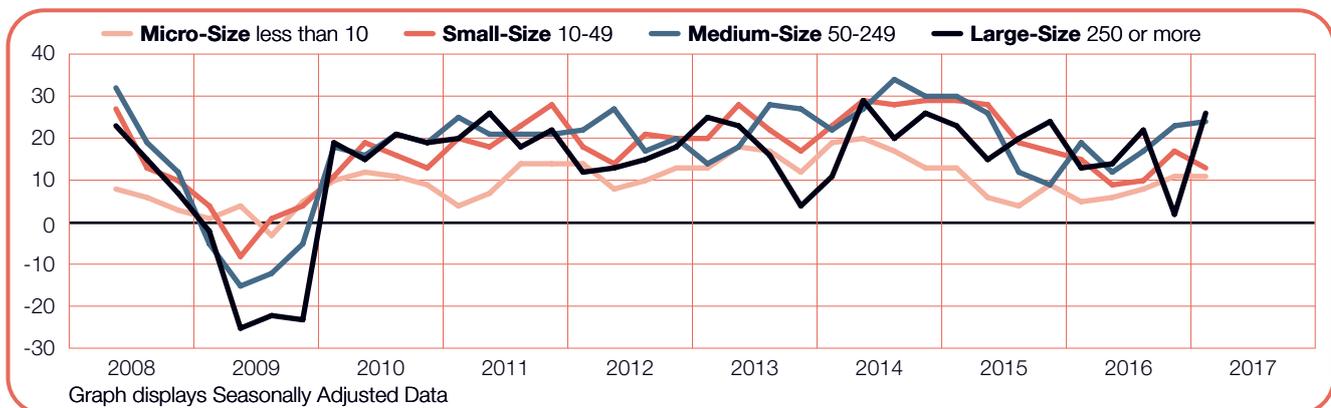

Participating employers are categorised into one of four organisation sizes: Micro businesses have less than 10 employees; Small businesses have 10-49 employees; Medium businesses have 50-249 employees; and Large businesses have 250 or more employees.

Staffing levels are expected to increase in all four organisation size categories during the next three months. Large- and Medium-size employers forecast active labour markets with Net Employment Outlooks of +26% and +24%, respectively. Elsewhere, Small employers report steady hiring intentions with an outlook of +13%, and the outlook for Micro firms is +11%.

Quarter-over-quarter, Large employers report a steep improvement of 24 percentage points. Meanwhile, the outlook for Small employers declines by four percentage points, Medium employers report relatively stable hiring plans and Micro employers report no change.

Year-over-year, hiring prospects strengthen in three of the four organisation size categories, most notably by 13 percentage points for Large employers. The outlook for Micro firms is six percentage points stronger while Medium employers report an increase of five percentage points. However, Small employers report a decline of two percentage points.

Organisation-Size	Increase	Decrease	No Change	Don't Know	Net Employment Outlook	Seasonally Adjusted
	%	%	%	%	%	%
Micro-Size less than 10	12	1	84	3	11	11
Small-Size 10-49	15	2	79	4	13	13
Medium-Size 50-249	27	3	66	4	24	24
Large-Size 250 or more	29	2	65	4	27	26

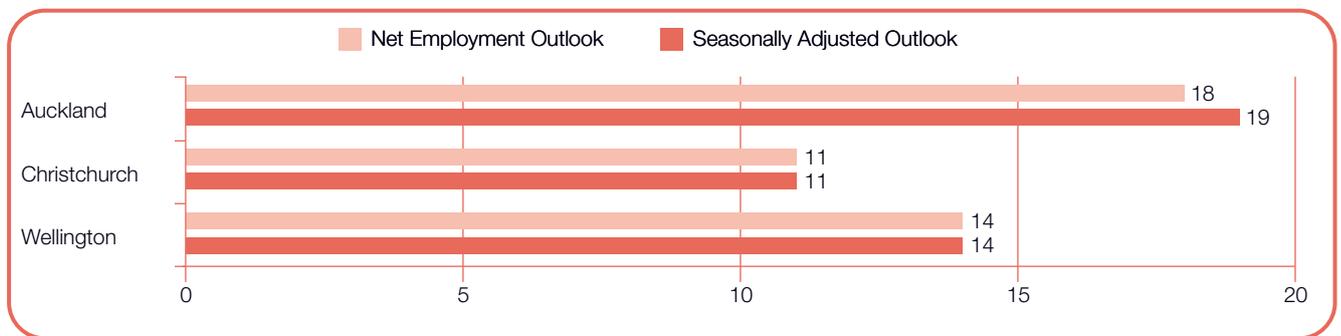

Regional Comparisons

Employers in all three regions forecast payroll gains during Quarter 1 2017. The strongest labour market is anticipated by Auckland employers who report a Net Employment Outlook of +19%. Elsewhere, steady workforce gains are expected in Wellington, with an outlook of +14%, and in Christchurch, where the outlook stands at +11%.

Outlooks improve in two of the three regions quarter-over-quarter, with employers in both Auckland and Wellington reporting increases of three percentage points. Meanwhile, Christchurch employers report a decline of two percentage points.

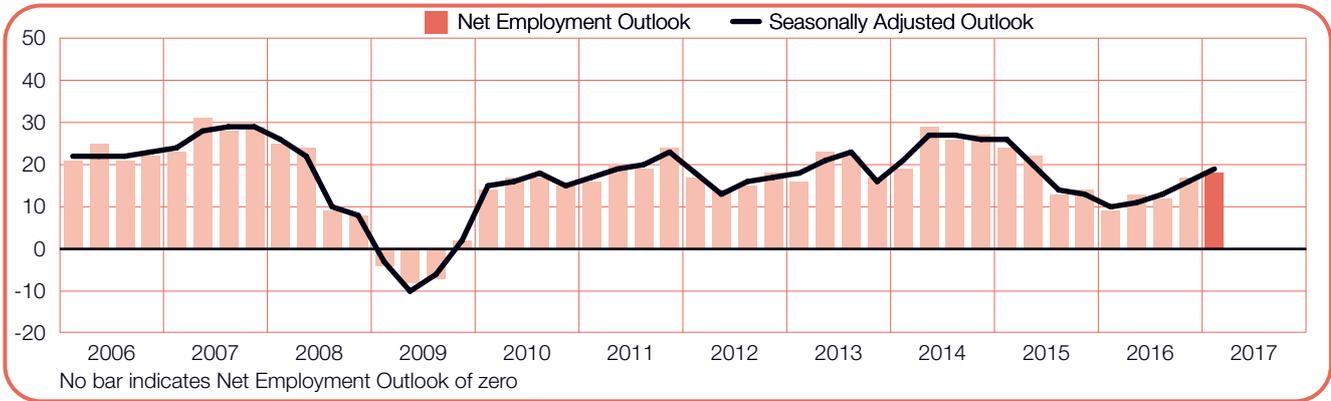

Year-over-year, hiring intentions are nine percentage points stronger in Auckland and improve by four percentage points in Wellington. However, Christchurch employers report a decline of seven percentage points.

+18 (+19)%

Auckland

Job seekers can expect an upbeat hiring pace in the first quarter of 2017, according to employers who report a Net Employment Outlook of +19%. Hiring prospects improve by three and nine percentage points quarter-over-quarter and year-over-year, respectively.

+11 (+11)%

Christchurch

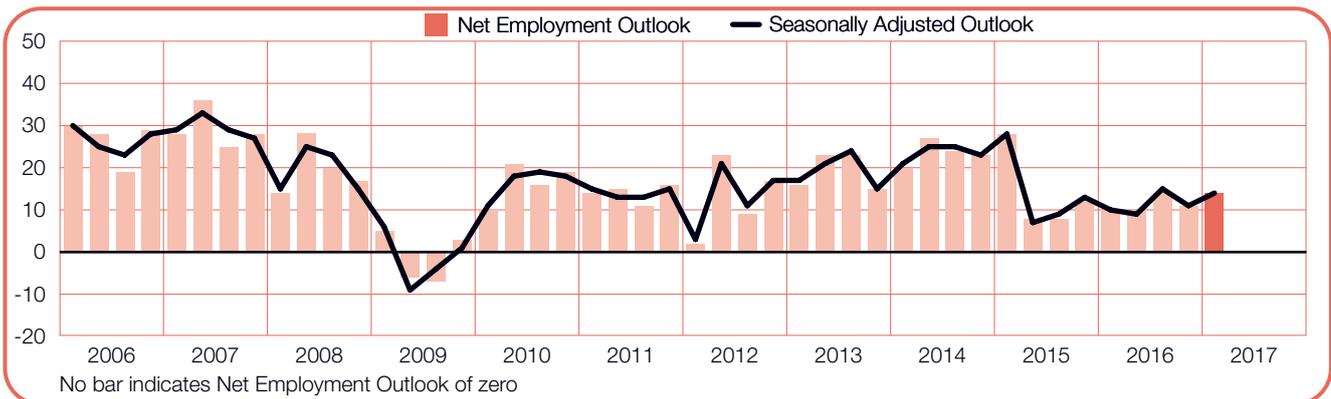

With a Net Employment Outlook of +11%, employers anticipate steady payroll growth during the next three months. However, the outlook declines by two percentage points quarter-over-quarter and is seven percentage points weaker when compared with Quarter 1 2016.

+14 (+14)%

Wellington

A favourable hiring climate is forecast in the coming quarter, with employers reporting a Net Employment Outlook of +14%. Hiring plans improve by three and four percentage points quarter-over-quarter and year-over-year, respectively.

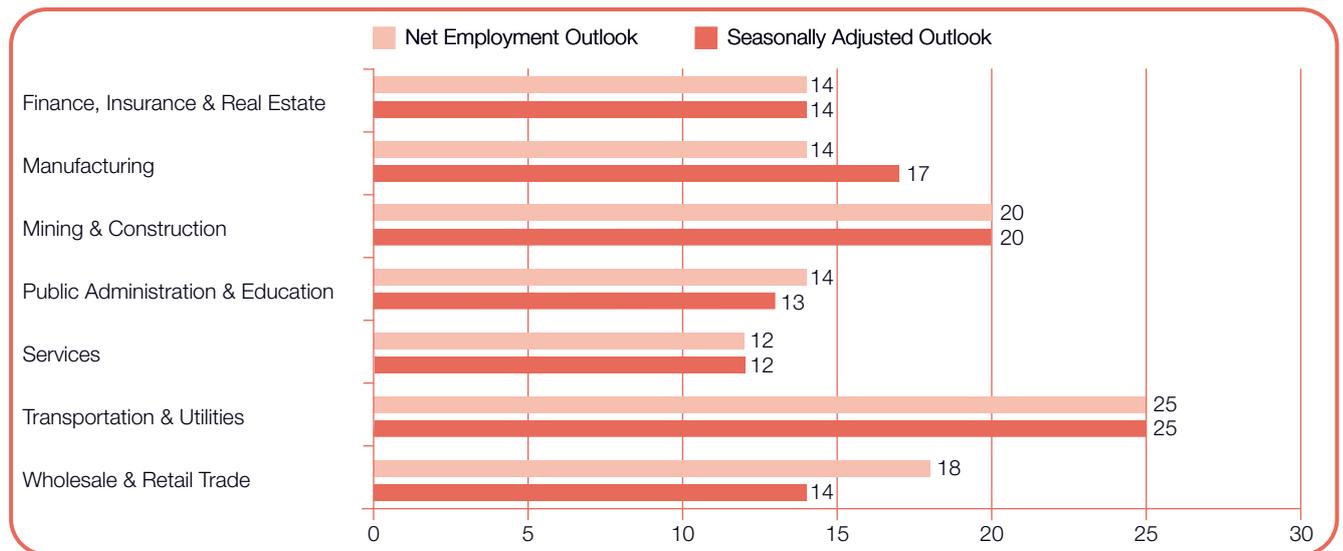

Sector Comparisons

Employers in all seven industry sectors forecast an increase in staffing levels during the upcoming quarter. Transportation & Utilities sector employers expect the strongest hiring pace, reporting a Net Employment Outlook of +25%. Hopeful hiring plans are reported in the Mining & Construction sector, where the outlook is +20%, and in the Manufacturing sector, with an outlook of +17%. Elsewhere, respectable payroll gains are forecast by employers in both the Finance, Insurance & Real Estate sector and the Wholesale Trade & Retail Trade sector, with outlooks of +14%. Meanwhile, the weakest of the seven sector outlooks stands at +12% for the Services sector.

When compared with Quarter 4 2016, hiring prospects improve in three of the seven industry sectors, most notably by 14 percentage points in the Transportation & Utilities sector. Manufacturing sector employers

report an improvement of four percentage points and the outlook for the Public Administration & Education sector is three percentage points stronger. However, hiring plans decline in three sectors, including the Mining & Construction sector and the Wholesale Trade & Retail Trade sector, with decreases of seven and three percentage points, respectively.

Year-over-year, outlooks strengthen in five of the seven industry sectors. Transportation & Utilities sector employers report the most noteworthy increase of 14 percentage points while outlooks are nine and seven percentage points stronger in the Manufacturing sector and the Wholesale Trade & Retail Trade sector, respectively. Elsewhere, Finance, Insurance & Real Estate sector employers report a decline of four percentage points and the Services sector outlook is two percentage points weaker.

+14 (+14)%

Finance, Insurance & Real Estate

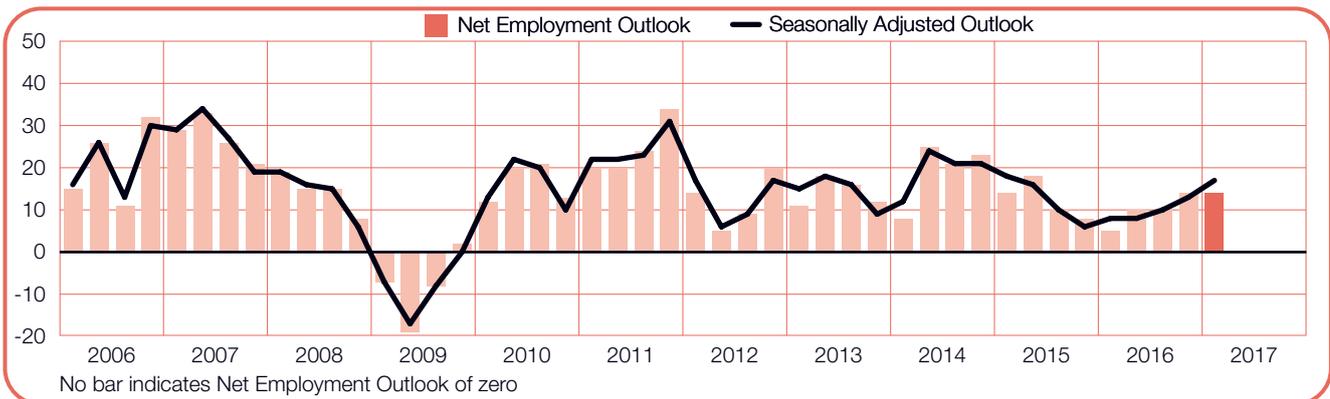

Job seekers can expect the steady hiring pace to continue in Quarter 1 2017, according to employers who report a Net Employment Outlook of +14% for the second consecutive quarter. Year-over-year, hiring prospects decline by four percentage points.

+14 (+17)%

Manufacturing

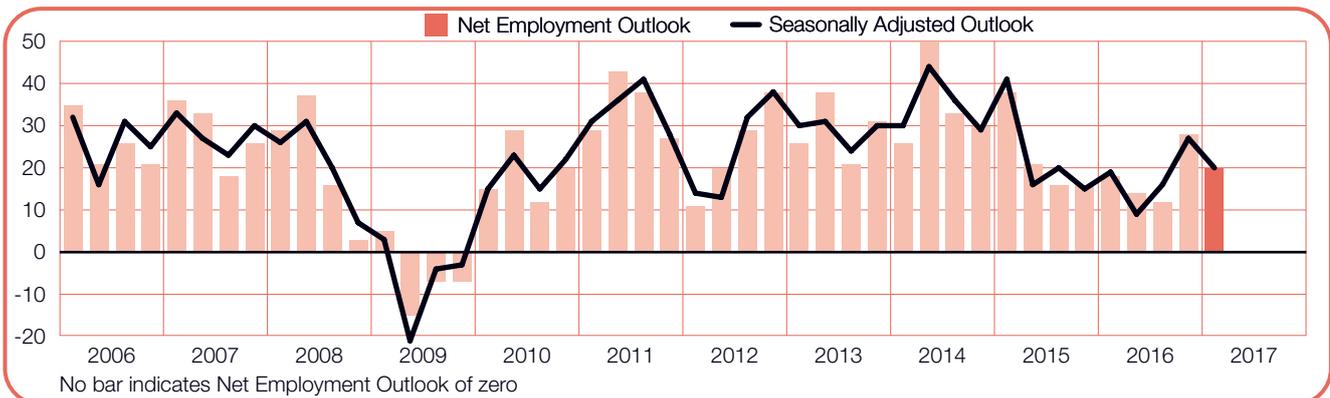

With a Net Employment Outlook of +17%, employers anticipate the strongest labour market in two years in the upcoming quarter. Hiring intentions improve both quarter-over-quarter and year-over-year, increasing by four and nine percentage points, respectively.

+20 (+20)%

Mining & Construction

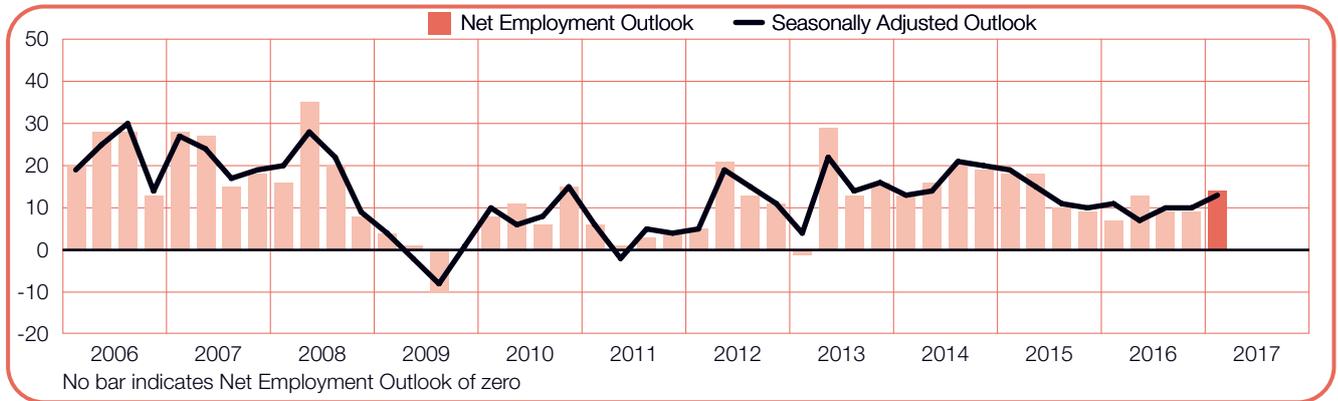

Employers forecast positive hiring activity in the next three months. The Net Employment Outlook of +20% declines by seven percentage points quarter-over-quarter but remains relatively stable year-over-year.

+14 (+13)%

Public Administration & Education

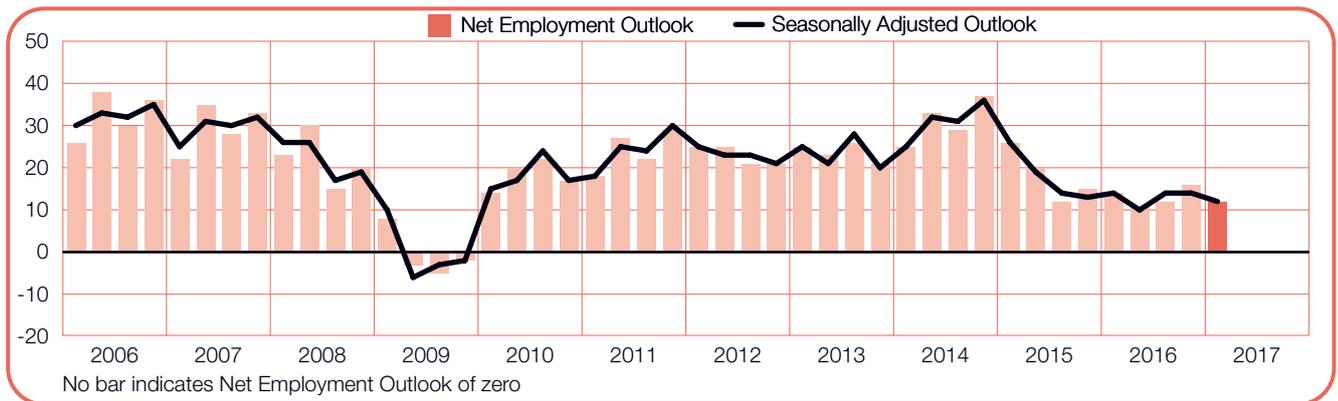

Respectable payroll gains are anticipated in the January-March time frame with employers reporting a Net Employment Outlook of +13%. Hiring intentions are three percentage points stronger quarter-over-quarter and improve by two percentage points year-over-year.

+12 (+12)%

Services

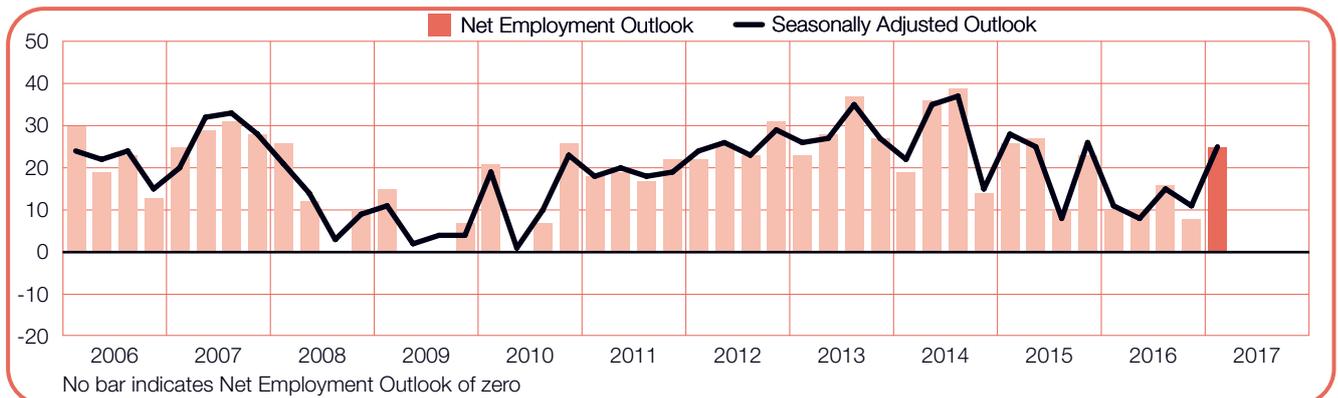

A favourable hiring climate is forecast for the first quarter of 2017 with employers reporting a Net Employment Outlook of +12%. However, hiring plans are two percentage points weaker both quarter-over-quarter and year-over-year.

+25 (+25)%

Transportation & Utilities

Job seekers can expect to benefit from an active hiring pace in the forthcoming quarter, according to employers who report a Net Employment Outlook of +25%. The outlook improves by 14 percentage points both quarter-over-quarter and year-over-year.

+18 (+14)%

Wholesale & Retail Trade

Reporting a Net Employment Outlook of +14%, employers anticipate steady job gains during Quarter 1 2017. While the outlook is three percentage points weaker quarter-over-quarter, employers report a year-over-year improvement of seven percentage points.

* Indicates unadjusted data.

1. Number in parentheses is the Net Employment Outlook when adjusted to remove the impact of seasonal variations in hiring activity. Please note that this data is not available for all countries as a minimum of 17 quarters worth of data is required.

The ManpowerGroup Employment Outlook Survey is ManpowerGroup's quarterly index of employer hiring confidence.

ManpowerGroup interviewed nearly 59,000 employers across 43 countries and territories to forecast labour market activity* in Quarter 1 2017. All participants were asked, "How do you anticipate total employment at your location to change in the three months to the end of March 2017 as compared to the current quarter?"

The research from ManpowerGroup indicates job seekers across the globe will likely find some opportunities through the first three months of 2017. Hiring activity is expected to continue in the majority of the world's labour markets and most outlooks remain relatively stable or improve from three months ago and last year at this time. Altogether, employers in 40 of 43 countries and territories intend to add to their payrolls by varying degrees at the start of 2017, and the survey reveals few signs that uncertainty associated with the Brexit vote or the U.S. election will result in any significant labour market volatility. Instead, employers appear content to keep a watchful eye on marketplace conditions and adjust workforce levels according to their business needs.

Overall, forecasts are mixed in comparison to the Quarter 4 2016 and Quarter 1 2016 surveys. Hiring plans improve in 19 of 43 countries and territories when compared quarter-over-quarter, decline in 17, and are unchanged in seven. Outlooks strengthen in 20 countries and territories year-over-year, weaken in 18, and are unchanged in four. First-quarter hiring confidence is strongest in Taiwan, India, Japan, Hungary and Slovenia. The weakest forecasts are reported in Brazil, Switzerland and Italy.

Job gains are expected in nine of the 10 countries surveyed in the Americas. Hiring confidence strengthens in four countries, declines in four, and is unchanged in two when compared to the final three months of 2016. Year-over-year, hiring prospects improve in four countries but weaken in the remaining six. The strongest first-quarter hiring plans are reported in both Guatemala and the United States, while employers in Brazil expect payrolls to shrink for the eighth consecutive quarter and report the weakest hiring plans across the region as well as across the globe.

Employers expect staffing levels to increase by varying degrees in 23 of 25 countries in the Europe, Middle East & Africa (EMEA) region. When compared quarter-over-quarter, hiring plans improve in 12 countries, weaken in 10 and are unchanged in three. In a year-over-year comparison, outlooks improve in 15 countries, decline in seven and are unchanged in two.** The region's most optimistic first-quarter hiring plans are reported in Hungary and Slovenia with employers in both countries expecting the strongest labour market activity since the surveys were launched in their respective countries. Conversely, the weakest employer sentiment is reported in Switzerland where the outlook slips into negative territory for the first time in two years and in Italy where labour market activity is expected to be flat in the first three months of the year.

Employers in all eight Asia Pacific countries and territories expect workforce gains in the January-March time frame. When first-quarter forecasts are compared with the final three months of 2016, hiring plans strengthen in three countries/territories, weaken in three and are unchanged in two. In a year-over-year comparison hiring is expected to accelerate only in New Zealand, slow in five other countries/territories and remain unchanged in two. Taiwanese employers expect the strongest hiring pace in the region as well as across the globe. Meanwhile, Chinese employers report the region's most cautious hiring plans.

Full survey results for each of the 43 countries and territories included in this quarter's survey, plus regional and global comparisons, can be found at

www.manpowergroup.com/meos

The next ManpowerGroup Employment Outlook Survey will be released on 14 March 2017 and will detail expected labour market activity for the second quarter of 2017.

* Commentary is based on seasonally adjusted data where available. Data is not seasonally adjusted for Portugal.

** Portugal joined the survey in Quarter 3 2016 and has no year-over-year trend data to compare at this point.

International Comparisons – Asia Pacific

Nearly 15,000 employers were interviewed in the Asia Pacific region. Employers in each of the eight countries and territories intend to add to their workforces through the first three months of the year, although hiring expectations vary widely.

Taiwan's employers report the region's strongest first-quarter hiring intentions as well as the most optimistic outlook among the survey's 43 participating countries and territories. Buoyed by expectations of continued export growth and improving private consumption figures, one of every four Taiwanese employers expect to add to their workforces in the January-March time frame.

India's hiring pace is expected to slow for the fourth consecutive quarter, and employer optimism dips to its least optimistic level since Quarter 3 2013. However, more than one in five Indian employers tell us they intend to add to their payrolls through the next three months. As a result, India's hiring pace is expected to be stronger than all countries and territories participating in the survey except Taiwan. Employers predict solid levels of job growth in each of India's seven industry sectors, with particular emphasis on knowledge workers across virtually every industry sector.

Opportunities for job seekers in Japan remain strong, and a quarter of all employers anticipate adding to their payrolls in the January-March time frame. However, securing the talent they need continues to prove an elusive goal for most employers in Japan. As ManpowerGroup's recent Talent Shortage Survey reveals, employers remain challenged by a shrinking pool of available talent and few prospects that a solution to the shortage will be found soon.

Employers in China remain cautiously optimistic with some payroll growth forecast in all industry sectors and regions. However, nearly two thirds of survey respondents replied with "Don't Know" when asked to share their hiring plans for the January-March time frame. This uncertainty may signal an expanding effort to maintain workforce flexibility and adjust payrolls as needed as the country continues its transition to a more services-oriented economy.

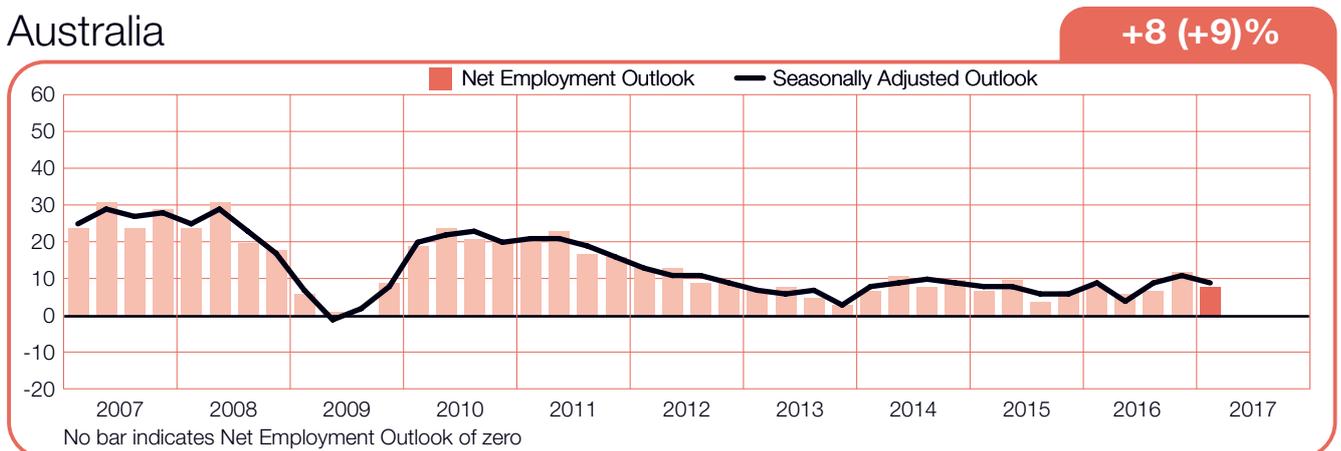

Australia's efforts to emphasise non-mining sectors of the economy appear to be maintaining traction. Employers across all sectors and regions expect varying degrees of payroll gains, with the most opportunities for job seekers expected in the Services and Finance, Insurance & Real Estate sectors.

Employer hiring plans are also uniformly positive in New Zealand. The forecast indicates that the most active labour markets will be in the Transportation & Utilities and Mining & Construction sectors.

Elsewhere, the hiring climate in Hong Kong is expected to remain favourable despite an overall slowdown in retail and tourism activity. Services sector employers report the first quarter's strongest outlook, with steady hiring also expected in the Mining & Construction sector where a quarter of the employers surveyed say they intend to add to payrolls in the January-March period.

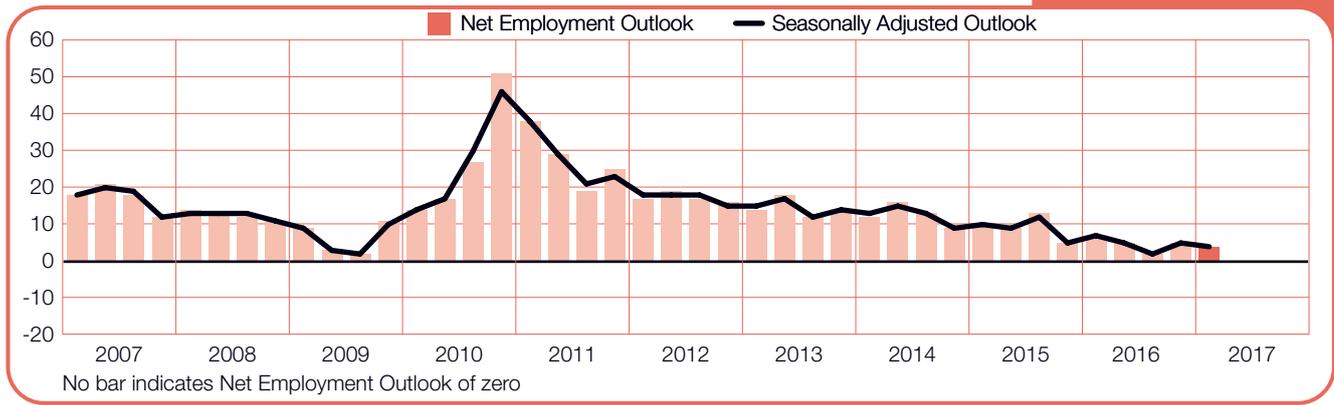

Employers in most of Singapore's industry sectors expect varying degrees of job growth. The exception is the Wholesale & Retail Trade sector where the outlook has gradually declined for four consecutive quarters and employers report their first negative forecast since the 2009 recession.

International Comparisons – Americas

ManpowerGroup interviewed over 23,000 employers from 10 countries throughout North, Central and South America for the Quarter 1 2017 survey. First-quarter payrolls are expected to grow in all countries except Brazil.

The region's most optimistic hiring plans are reported in Guatemala and the U.S. with approximately one of every five employers in both countries expecting to add to their payrolls in the January-March time frame. Employer confidence in the U.S. is strongest in the Leisure & Hospitality sector with upbeat forecasts also reported in the Wholesale & Retail Trade and Transportation & Utilities sectors. In Guatemala one of every four employers surveyed in the Manufacturing sector plans to hire, boosting that sector's forecast to its most optimistic level since early 2010.

Opportunities for Canadian job seekers are expected to be the strongest in three years. Public Administration sector employers report the first quarter's most active hiring plans and the forecast climbs to its most optimistic level since Quarter 4 2008. Increasingly favourable forecasts are also reported in both the Durable and Non-Durable Manufacturing sectors as the weak Canadian dollar is expected to boost U.S. demand for manufactured output.

In Mexico, employer confidence remains upbeat with workforce gains expected in all industry sectors and regions. The strongest hiring intentions are reported in both the Transport & Communications sector and the Manufacturing sector where anticipated job gains are boosted in large part by automotive industry hiring plans.

Meanwhile, the hiring pace in Costa Rica is expected to remain steady through the first three months of the

year with upbeat forecasts reported in most industry sectors and regions. Outlooks are also positive across Panama's industry sectors, but hiring is expected to be moderately slower in comparison to year-ago levels.

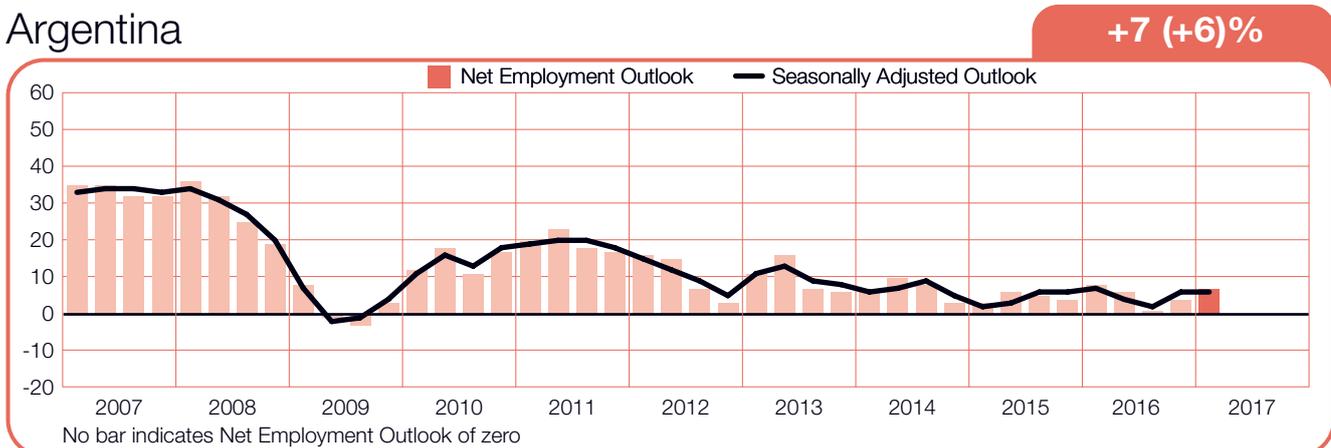

Colombia's employers anticipate some opportunities for job seekers in the next three months. However, the outlook dips for the third consecutive quarter to its least optimistic level since Quarter 3 2009, weighed down by the weakest Services sector forecast reported since the survey was launched in Quarter 4 2008 and the gloomiest Mining sector forecast since this sector began reporting separately in 2013.

Hiring plans are uniformly positive across Peru's industry sectors and regions. However, despite sharp year-over-year gains in the Construction and Mining sectors, overall hiring activity is expected to be little changed when compared to the prior quarter and last year at this time.

High inflation continues to temper employer confidence in Argentina. But the overall forecast remains cautiously optimistic with payrolls expected to grow in most industry sectors and regions. The Agriculture sector forecast is the strongest in more than five years following four consecutive quarters of growth and expectations of a record grain harvest.

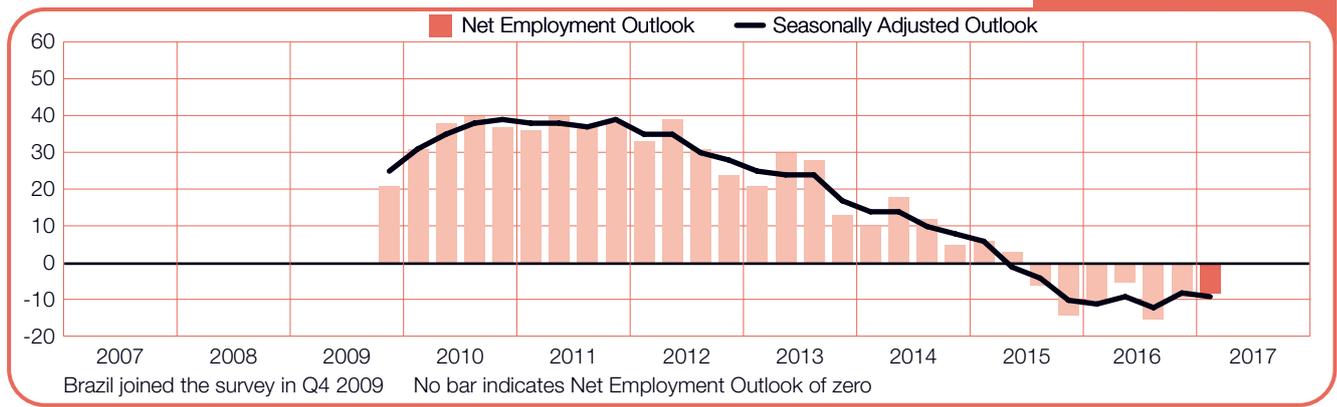

Once again Brazilian employers report the weakest hiring plans across the region, as well as across the globe, and the forecast remains mired in negative territory for the eighth consecutive quarter. Prospects for job seekers in the Construction sector remain dim, and the Services sector forecast grows more negative following steep quarter-over-quarter and year-over-year declines.

International Comparisons – EMEA

ManpowerGroup interviewed nearly 21,000 employers in 25 countries in the Europe, Middle East and Africa (EMEA) region. Some level of job growth is expected in all of the countries during the January-March time frame except in Italy and Switzerland.

Employers in Hungary and Slovenia report the strongest first-quarter forecasts, and hiring intentions in both countries are the most optimistic reported since their respective surveys were launched. Hungary's upbeat outlook is fuelled by unprecedented optimism in both the Construction and Wholesale & Retail Trade sectors. Similarly, Slovenia's forecast is underpinned by the most optimistic forecasts reported to date in five of the country's 10 industry sectors, with the Construction and Wholesale & Retail Trade sector outlooks also included among the five.

Job seekers will likely find similarly favourable first-quarter hiring opportunities in both Romania and Bulgaria. Romania's outlook is the strongest since Quarter 4 2008, with most hiring activity expected in the Manufacturing and Wholesale & Retail Trade sectors where approximately three of every 10 employers say they intend to add to their payrolls. Bulgaria's forecast is highlighted by the strongest outlooks reported in the Finance, Insurance & Real Estate, Manufacturing, and Wholesale & Retail Trade sectors since the survey began.

Noteworthy advances in employer confidence are also evident in Belgium with the strongest forecast reported since Quarter 3 2011. The outlook is buoyed, in large part, by the most optimistic hiring intentions reported in more than five years in the Finance & Business Services sector.

Similarly, Austrian forecasts in both the Manufacturing and Agriculture sectors are the strongest since Quarter 4 2008, and help boost the country's overall outlook to a level last reported in Quarter 3 2012.

Employer confidence is trending in the opposite direction in Ireland. The outlook grows more conservative as forecasts soften in most industry sectors and regions in both quarter-over-quarter and year-over-year comparisons.

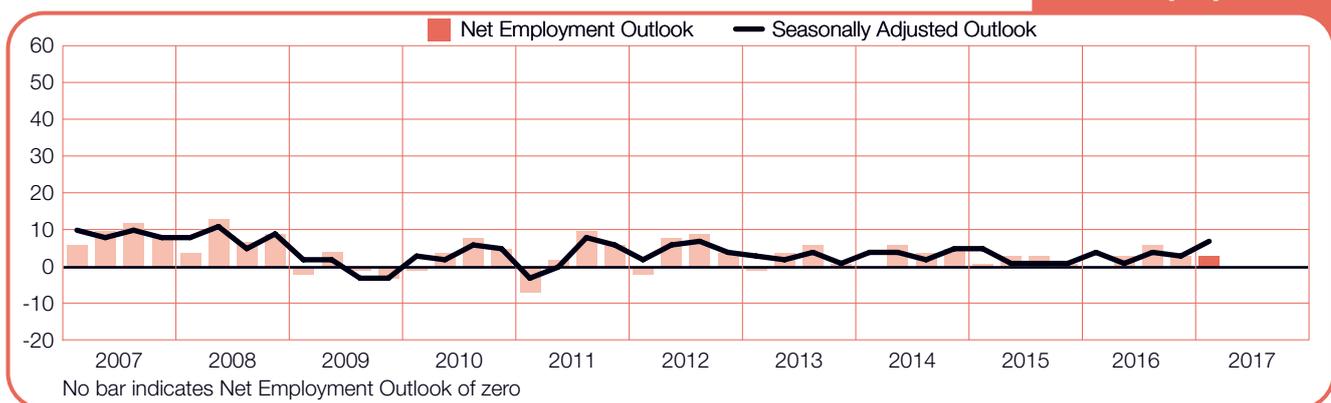

Elsewhere, workforce gains are expected to be modest. Employers in the United Kingdom remain resilient following the Brexit referendum, with hiring plans actually improving slightly from the prior quarter and remaining relatively stable when compared to last year at this time.

Some level of payroll growth is expected across all industry sectors in Germany, with the most opportunities expected in the Finance & Business Services sector. The survey indicates the hiring pace in France will be more subdued, but job growth is anticipated in most industry sectors, particularly in the Transport, Storage & Communications sector where the outlook climbs considerably from both the prior quarter and last year at this time.

Employer hiring confidence is decidedly more muted in Italy and Switzerland. Italy's outlook is relatively stable in comparison to the prior quarter and last year at this time, but hiring intentions are negative in six of 10 industry sectors and two of four regions. The Swiss forecast drifts again into negative territory for the first time in two years, dipping slightly in both quarter-over-quarter and year-over-year comparisons.

About the ManpowerGroup Employment Outlook Survey

The ManpowerGroup Employment Outlook Survey is conducted quarterly to measure employers' intentions to increase or decrease the number of employees in their workforces during the next quarter.

ManpowerGroup's comprehensive forecast of employer hiring plans has been running for more than 50 years and is one of the most trusted surveys of employment activity in the world. Various factors underpin the success of the ManpowerGroup Employment Outlook Survey:

Unique: It is unparalleled in its size, scope, longevity and area of focus.

Projective: The ManpowerGroup Employment Outlook Survey is the most extensive, forward-looking employment survey in the world, asking employers to forecast employment over the next quarter. In contrast, other surveys and studies focus on retrospective data to report on what occurred in the past.

Independent: The survey is conducted with a representative sample of employers from throughout the countries and territories in which it is conducted. The survey participants are not derived from ManpowerGroup's customer base.

Robust: The survey is based on interviews with nearly 59,000 public and private employers across 43 countries and territories to measure anticipated employment trends each quarter. This sample allows for analysis to be performed across specific sectors and regions to provide more detailed information.

Focused: For more than five decades the survey has derived all of its information from a single question:

For the Quarter 1 2017 research, all employers participating in the survey worldwide are asked the same question, "How do you anticipate total employment at your location to change in the three months to the end of March 2017 as compared to the current quarter?"

Methodology

The ManpowerGroup Employment Outlook Survey is conducted using a validated methodology, in accordance with the highest standards in market research. The survey has been structured to be representative of each national economy. The margin of error for all national, regional and global data is not greater than +/- 3.9%.

In New Zealand, the national survey is conducted by external surveyors and includes 658 employers. With this number of interviews, the margin of error for the New Zealand Survey is +/- 3.8%.

Net Employment Outlook

Throughout this report, we use the term "Net Employment Outlook." This figure is derived by taking the percentage of employers anticipating an increase in hiring activity and subtracting from this the percentage of employers expecting to see a decrease in employment at their location in the next quarter. The result of this calculation is the Net Employment Outlook. Net Employment Outlooks for countries and territories that have accumulated at least 17 quarters of data are reported in a seasonally adjusted format unless otherwise stated.

Seasonal adjustments have been applied to the data for all participating countries except Portugal. ManpowerGroup intends to add seasonal adjustments to the Portuguese data in the future, as more historical data is compiled. Note that in Quarter 2 2008, ManpowerGroup adopted the TRAMO-SEATS method of seasonal adjustment for data.

About ManpowerGroup®

ManpowerGroup® (NYSE: MAN) is the world's workforce expert, creating innovative workforce solutions for nearly 70 years. As workforce experts, we connect more than 600,000 people to meaningful work across a wide range of skills and industries every day. Through our ManpowerGroup family of brands – Manpower®, Experis®, Right Management® and ManpowerGroup® Solutions – we help more than 400,000 clients in 80 countries and territories address their critical talent needs, providing comprehensive solutions to resource, manage and develop talent. In 2016, ManpowerGroup was named one of the World's Most Ethical Companies for the sixth consecutive year and one of Fortune's Most Admired Companies, confirming our position as the most trusted and admired brand in the industry. See how ManpowerGroup makes powering the world of work humanly possible: www.manpowergroup.com.

About ManpowerGroup New Zealand

ManpowerGroup established its first offices in New Zealand in 1996. The company operates under the brand names of Manpower, Experis and Right Management.
